SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable enterprise applications using Java, Spring Boot, React, and RESTful microservices. Experienced in backend optimisation, batch processing, cloud-ready systems, and Agile software delivery. Strong background in performance improvement, production support, CI/CD collaboration, and cross-functional development within enterprise environments.

WORK EXPERIENCE

Technology Analyst

July 2023 – December 2023

Infosys Ltd., Pune, Maharashtra, India

- Spearheaded migration of legacy systems from Struts to Spring, achieving a 30% increase in system performance and maintainability.
- Completed 20+ code reviews, ensuring adherence to best practices and design patterns.
- Trained and mentored 5+ new team members and provided support as a technical supervisor. Documented onboarding instructions and monitored knowledge transfer processes.
- Collaborated with cross-functional teams to gather and translate client requirements into technical specifications, successfully delivering 10+ enterprise-grade solutions.

Senior Systems Engineer

October 2022 – June 2023

Infosys Ltd., Pune, Maharashtra, India

- Developed an approval workflow for multi-authority systems, streamlining application acceptance or rejection processes for company-wide users.
- Engineered a robust download functionality, exporting 100,000+ database records into multiple Excel sheets using multi-threading and streaming APIs.
- Built robust batch jobs for backend data processing, reducing manual interventions by 40%.
- Resolved 40+ critical production issues, ensuring continuous application uptime and SLA compliance.
- Developed a detailed system architecture document explaining workflows and dependencies of various applications of multiple departments.
- Participated in sprint planning, daily standups, and retrospectives. Led demos with cross-functional stakeholders.

System Engineer

January 2021 – September 2022

Infosys Ltd., Pune, Maharashtra, India

- Optimised performance of the database by 13% for critical business operations by improving PostgreSQL queries and procedures.
- Designed 5+ new methods and backend workflows as part of feature enhancements across multiple modules.
- Designed and implemented Import and Export XML functionality for modules, enabling data transfer.
- Developed and optimised RESTful microservices using the Spring framework for large-scale enterprise systems, enhancing scalability and modularity.
- Refactored code for 10+ core modules, reducing API response time by up to 55%, and enhanced user satisfaction.

Software Developer Intern

June 2019 – October 2019

V. Kumar Solutions(I) Pvt. Ltd., Pune, Maharashtra, India

- Developed and deployed 3 web applications using Java, Spring, and Hibernate, contributing to key client deliverables.
- Developed responsive React-based user interfaces integrated with Spring Boot REST APIs for enterprise web applications, improving front-end usability by 15%.
- Developed and integrated 5+ RESTful APIs to enable seamless front-end and back-end communication.

SKILLS & APPLICATIONS

Programming Languages & Frameworks: C, C++, Java 17, Spring MVC, Spring Boot, Hibernate, SQL, JavaScript, JSP, Servlet, JPA, JUnit 5, Mockito, Selenium, HTML, CSS, Bootstrap, React, Angular, Python, R
Applications & Platforms: Eclipse IDE, Oracle, MySQL, PostgreSQL, MongoDB, Postman, SonarQube, Visual Studio, Maven, GitHub, Jira, Jenkins, PyCharm, Jupyter, RStudio, Docker, Kubernetes, AWS, GCP, Azure
Soft Skills: Adaptability, Communication, Teamwork, Problem-solving, Critical Thinking, Time Management, Leadership

EDUCATION

Master of Advanced Computer Science

January 2024 – September 2025

University of Hertfordshire, Hatfield, Hertfordshire, UK

GPA: 4.33/4.5

Key Modules: Computer Algorithms and Paradigms, Theory and Practice of AI, Artificial Life with Robotics, Team Research and Development Project, Responsible Technology, Advanced Computer Science Masters Project.

Bachelor of Computer Engineering

June 2016 – April 2020

Savitribai Phule Pune University, Pune, Maharashtra, India

CGPA: 7.92/10

Key Modules: Object-oriented Programming, Data Structures and Algorithms, Operating Systems, Computer Networks, Database Management Systems, Software Engineering, Software Testing, Cyber Security, Distributed Systems.

CERTIFICATIONS & AWARD

SEED Infotech, Pune

Java Programming

November 26, 2018

Advanced Java Programming

March 03, 2019

Microsoft

Microsoft Azure AI Fundamentals

May 12, 2025

NVIDIA

AI for All: From Basics to GenAI Practice

November 21, 2024

Fundamentals of Deep Learning

June 10, 2025

Applications of AI for Predictive Maintenance

June 10, 2025

Infosys Ltd.

Insta Award- Recognised for delivering high-quality work and exceeding project expectations.

February 2022

PROJECTS

Multi-Agent Mental Health Chatbot using Fine-tuning and Prompt Engineering

January 2025 – May 2025

Technologies: Python, Flask, React.js, Google Colab, Mistral-7B, Transformers such as BERT, mBERT, RoBERTa

- Built three core task-specific agents: diagnosis, therapy and history tracking. Integrated backend of Python (Flask API) and React.js frontend with ngrok for connectivity.
- Diagnosis agent achieved 88.37% accuracy, outperforms pre-trained counterparts by ~5.5x, which was selected by comparing the performances of BERT, mBERT and RoBERTa models.
- The therapy agent was developed to generate empathetic and disorder-specific therapy responses using prompt engineering on Mistral-7B, improving BLEU-4 by 12.3% and ROUGE-L by 10% over baseline.

Machine Learning based Diabetes Detection System

June 2019 – March 2020

Technologies: Python, Oracle, Machine Learning

- Developed a desktop application to detect diabetes using a machine learning model without the assistance of a doctor. The patient can enter the results from medical tests, and the system generates the diabetes detection result.
- To detect disease, implemented and compared machine learning algorithms such as support vector machine and decision tree to achieve better results than existing prediction systems.

Expense Management Application

June 2018 – November 2018

Technologies: Java, MySQL

- Developed an Android software application that allows users to manage their expenses systematically and more conveniently, instead of writing them manually.
- The primary aim was to provide users with quick access to expense records.
